

1. A tool chest for holding scrapbook making supplies, comprising:
a tool holder having at least one compartment that holds different scrapbook supplies;
and
at least one picture holder portion positioned atop the tool holder, and includes:
an anchor portion designed to hold, to the tool holder, at least one extension;
and
a resilient picture attachment device attached to the extension, and having a
resilient portion designed to hold a picture thereon.
2. The tool chest of claim 1, wherein there are two picture holder portions, where the
first picture holder portion is taller than the second picture holder portion.
3. The tool chest of claim 2, wherein the extension are bendable.
4. The tool chest of claim 3, wherein the extension is a wire stem.
5. The tool chest of claim 4, wherein the extension includes at least two picture
attachment devices attached to the stem.
6. The tool chest of claim 5, wherein the anchor portion includes several separate
anchor portions for several picture holder portions.
7. The tool chest of claim 6, wherein each of the anchor portions are designed to
hold more than one picture holder portion.
8. The tool chest of claim 7, wherein the anchor portions are is positioned at
different locations on the tool holder.

9. A tool chest for holding scrapbook making supplies, comprising
a tool storage area; and
a picture staging area located above the storage area.
10. The tool chest of claim 9, wherein the tool storage area includes:
a vertical item holder;
a drawer; and
a compartment.
11. The tool chest of claim 9, wherein the tool chest has a top surface that has at least one
picture holding device attached thereto.
12. The tool chest of claim 11, wherein the picture holding device has a picture retainer
that is designed to hold pictures that are being worked on prior to being placed into a scrap
book.
13. The tool chest of claim 12, wherein the picture holding device includes a stem that is
a single piece of material capable of holding a picture thereon in a picture retainer.
14. The tool chest of claim 9, wherein the picture holding device includes a telescoping
portion which has a telescoping stem that can be raised or lowered.
15. The tool chest of claim 14, wherein the telescoping portion includes additional
telescoping pieces to allow for further vertical adjustability.

16. The tool chest of claim 13, wherein the stem has the ability to bend and retain its position.

17. The tool chest of claim 11, wherein the picture holding device is designed to laterally move along a groove that is located on the top surface.

18. A tool chest for holding scrapbook making supplies, comprising
a tool storage area has a top surface with a groove located thereon; and
a picture staging area located above the storage area, and having at least one picture holding device designed to laterally move along the groove.

19. The tool chest of claim 18, wherein the picture holding device includes a telescoping portion which has a telescoping stem that can be raised or lowered, and wherein the stem has the ability to bend and retain its position.

20. The tool chest of claim 18, wherein the tool storage area includes:
a vertical item holders;
a drawer; and
a compartment.
